

CANNON DESIGN BRIGHAM & WOMENS HOSPITAL ORs & PACU

PROGRAMMING
SPACE PLANNING
PROJECT PHASING
PROJECT DRAWINGS & MODELS

2005 - 2008

These drawings and models convey different stages of development of the early PACU option. The lower drawing was a presentation drawing conveying distances and travel patterns to and from the PACU and the new and existing spaces.

In my analysis and program coordination of the space, I developed ideas that were presented to the owners as a longer term master plan for the OR department. This longer term plan has become a guiding plan for development optimization. My idea (shown below right) incorporates six enlarged ORs where the hospital had planned only two. This plan also maximizes the circulation and support potential through the OR zones.
