

CANNON DESIGN CAPITAL HEALTH SYSTEMS MULTI-FACILITY MASTER PLAN

HOSPITAL EXPANSION CHARRETTE CONSOLIDATION OPTIONS EXPANSION OPTIONS

2007 - 2008

My task in this project was to consider expansion and replacement building options for a multi-site master plan.

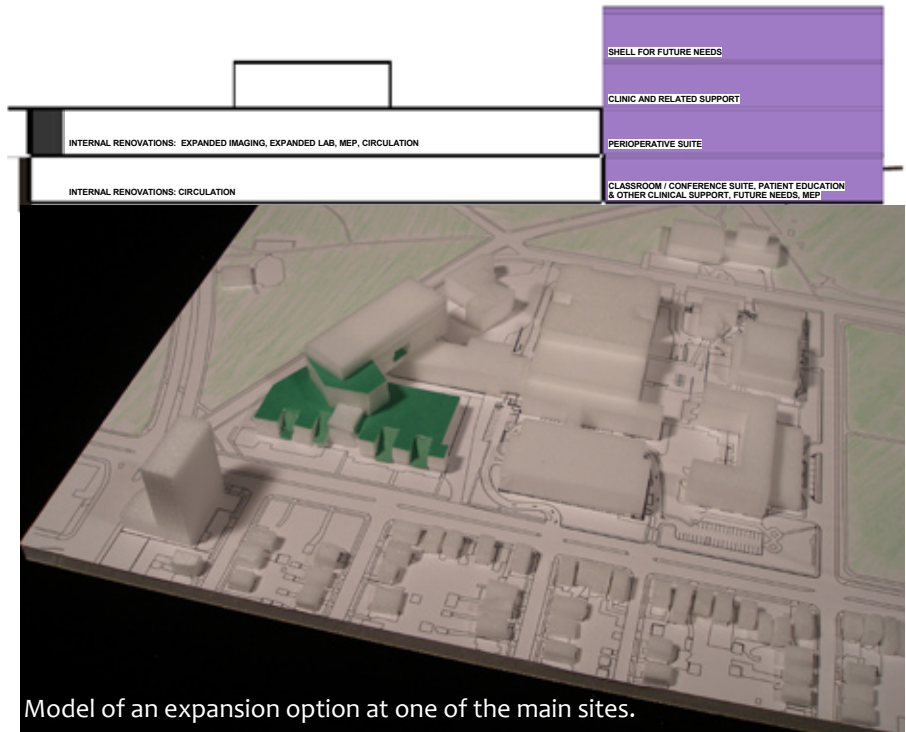

At one point, a design team charrette considered option for expansion of the main hospital complex. Each team member offered a different approach to the expansion. My approach, retained aspects of the history and scale of the neighboring community in effort to be sensitive to the residents.

Through the use of sketches, models and REVIT massing studies, I considered a variety of options across five sites.

Site plan for two expansion studies
